History

Mahidol University has its origins in the establishment of **Siriraj Hospital** in 1888 by His Majesty King Chulalongkorn (Rama V), and the hospital's medical school is the oldest institution of higher learning in Thailand, granting its first medical degree in 1893.

Later becoming the University of Medical Sciences in 1943, **Mahidol University** was renamed with great honor in 1969 by H.M. King Bhumibol Adulyadej , after his Royal Father, **H.R.H Prince Mahidol of Songkla ,** who is widely known as **the 'Father of Modern Medicine and Public Health in Thailand'.**

Mahidol University has since developed into one of the most prestigious universities in Thailand, internationally known and recognized for the high caliber of research and teaching by its faculty, and its outstanding achievements in teaching, research, international academic collaboration and professional services. This diversified institution now offers top quality programs in numerous social and cultural disciplines, including the most doctoral programs of any institution in Thailand, yet has maintained its traditional excellence in medicine and the sciences.

The Motto & Philosophy

The overall philosophy of Mahidol University is best captured by the university motto: Attānaṁ upamaṁ kare อตฺตานํ อุปมํ กเร In the Pali language, this translates as the Golden Rule in English: 'Do unto others as you would have others do unto you'. This underlying theme pervades every aspect of Mahidol University as it endeavors to imbue graduates with the conviction that, aside from achieving academic excellence, they have a solemn duty to improve the quality of life for all humanity. The university's namesake, H.R.H. Prince Mahidol, has eloquently stated Mahidol University's universal view of higher education: 'True success is not in the learning, but in its application to the benefit of mankind'. With the Royal Philosophy as a guiding light, Mahidol University continues to take progressive action to internationalize and diversify itself, so that its graduates will be globally informed as well as socially aware. In this globalized and interconnected world, Mahidol University recognizes that achieving academic and moral excellence requires maintaining strong relationships with the world community, and offering lifelong and equitable quality education for all.

Determination Statement: "Wisdom of the Land"

The Signature of
His Royal Highness Prince Mahidol

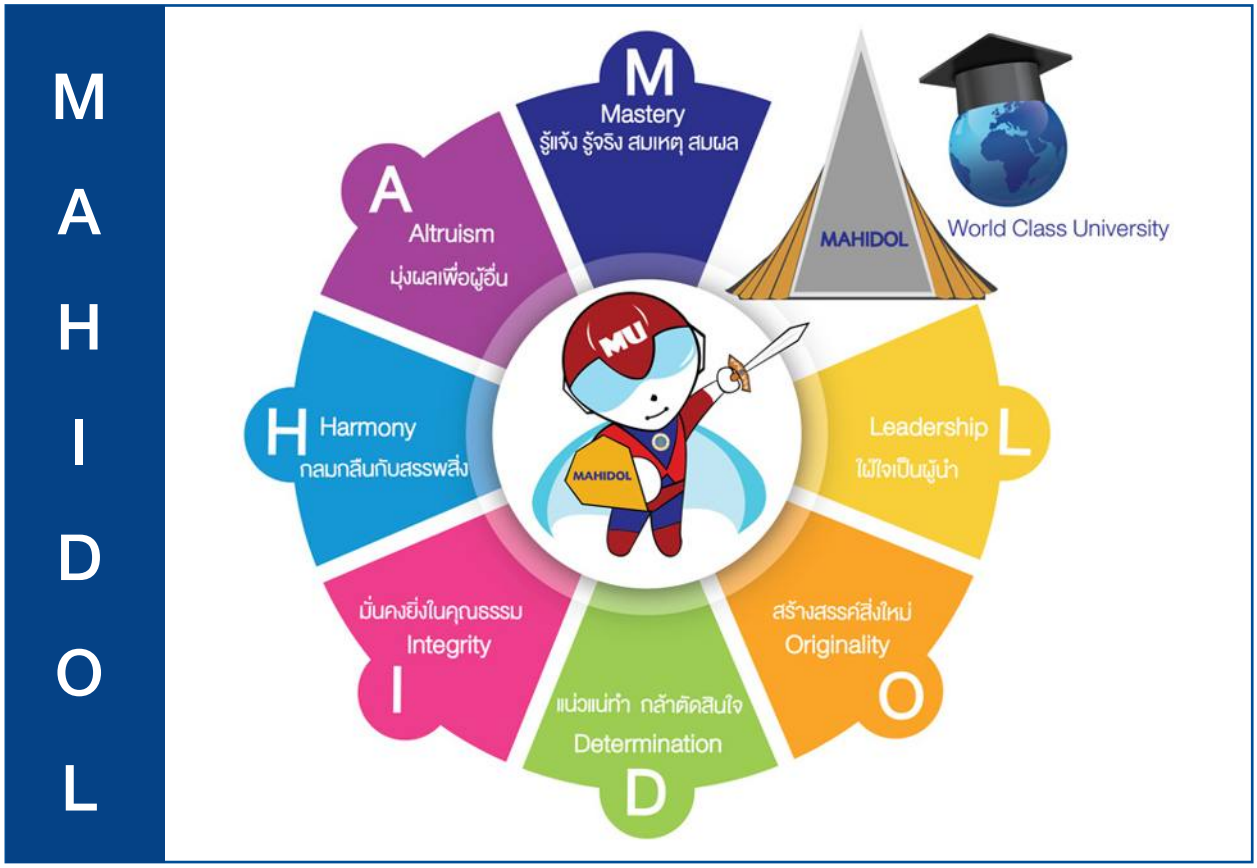
Vision

Mahidol University is determined to be a world class university.

Mission

To excel in health, sciences, arts, and innovation with integrity for the betterment of Thai society and the benefit of mankind.

Core Values



Strategies Objectives

1. Research Excellence
2. Teaching and Learning Excellence
3. Health Care and Services Excellence
4. Internationalization

The Symbolic Plant

Kan phai Mahidol (Afgekia mahidoliae B. L. Burtt & Chermsir.), the symbolic plants of Mahidol University, was named to commemorate the late Princess Mother, Somdej Phra Sri Nakarindra Boromarajajonnani (then Princess Srisangwan Mahidol). It is a rare tropical plant found in limestone mountains in the western side of Thailand. One among only three known species in the genus, A. mahidoliae is a climber in the pea family (Fabaceae). The plant possesses purplish and whitish pea-like florets in inflorescences which are usually in blooms during August to November…

Continually Expanding in the New Millennium

On 16 October 2007, the Thailand National Legislative Assembly approved Mahidol University as an autonomous institution. This transformation will enhance the university's efficiency, flexibility, and ability to innovate, and standardize its practices with those of other world-class universities. Recognizing the challenges facing humanity in the new millennium and the fundamental responsibility of higher education institutions to assist in meeting those challenges, Mahidol University follows a policy of constant expansion in the breadth and depth of its facilities and academic endeavors. By remaining globally aware and staying abreast not only to meet the needs of Thailand for education, training and research, but through internationalization, the needs of the global community as well. Philosophy, Vision, and Mission of the University

FACULTY OF MEDICAL TECHNOLOGY
MAHIDOL UNIVERSITY

The Faculty of Medical Technology, Mahidol University (MUMT) was founded as the first medical technology school in Thailand in 1957 by the late Professor Dr.Vikul Viranuvatti, who was the founding Dean and the pioneer of the medical technology profession in Thailand.

- To produce highly skilled and competent graduates in medical technology and radiological technology
- To advance research and innovation
- To excel in services excellence for the health promotion and the betterment of the society

THE DETERMINATION DRIVING THE FACULTY TO ACHIEVE ITS GOALS IS

“ The leading institute developing for the betterment of society ”

The faculty has initially based at Siriraj Hospital in Bangkok Noi, Bangkok and has then expanded its second location to Salaya, Nakhon Pathom.

The Faculty of Medical Technology
at Salaya

The Faculty of Medical Technology
at Bangkok-Noi

Vision

The faculty is geared to be a model organization of Medical Technology and Radiological Technology with international standards focused on creating knowledge, innovation and services for healthcare and benefit of the society in the year 2027

Mission

1. To produce highly skilled and competent graduates in medical technology and radiological technology
2. To advance research and innovation
3. To excel in services excellence for the health promotion and the betterment of the society

GRADUATE STUDIES PROGRAMS & STUDY PLANS

DOCTOR OF PHILOSOPHY PROGRAM

in Medical Technology (International Program)

Ph.D. program in Medical Technology (International Program)
Latest revised in 2022
For academic Year 2023 enrollment

1. Program Title Doctor of Philosophy Program in Medical Technology (International Program)

2. Name of Degree

In Thai :-

ชื่อเต็ม : ปรัชญาดุษฎีบัณฑิต (เทคนิคการแพทย์)

ชื่อย่อ : ปร.ด. (เทคนิคการแพทย์)

In English :-

Full name : Doctor of Philosophy (Medical Technology)

Abbreviation : Ph.D. (Medical Technology)

3. Responsible unit

Faculty of Medical Technology, Mahidol University

Faculty of Graduate Studies, Mahidol University

4. Philosophy

The Doctor of Philosophy Program (Ph.D.) in Medical Technology is the international program that emphasizes learning and researching for the innovations. The program is designed to equip students with the strong research competency, analytical and critical thinking skills, problem-solving skills, innovative capacity together with morality and ethics essential for finding and implementing innovative solutions and/or discovering novel body of knowledge and innovation that add meaningful knowledge to the field of study, contribute and lead to country and global sustainable development.

The Ph.D. program in Medical Technology covers the multi-disciplinary field of Medical Technology profession, radiological technology profession, human health, disease treatment, health informatics, advanced technology and other related fields. The program provokes into an active learning process of the students via multi-disciplinary approaches such as outcome-based learning, goal-oriented activities, problem solving, and individual experience sharing and searching for new information via information technology. Innovative research and publication on the dissertation work in an international standard journal are also required for degree graduation.

5. Distinctive features of the program

The Ph.D Program in medical technology at MUMT aims to bridge basic sciences, professional knowledge, advanced science and technology knowledge, together with fostering research to generate and/or discover novel body of knowledge/state of the art/innovation and leads to creation-innovation development in order to that adds meaningful knowledge to the field of study as well as contribute to the sustainable development of the country.

The program aims to develop strong research competent graduate students through the conduct of original research leading to the doctoral dissertation. The advantages of pursing a Ph.D in medical technology at MUMT include participation in cutting-edge medical technology, radiological technology and biomedical research and preparation for pursuing careers in academia, medical research, and professional arena.

Another distinctive feature of the Ph.D program is that graduate students participating in a multi-disciplinary model of education. The program provides learning system based on outcome based education, problem based learning, informatics searching and researching with publication in peer reviewed international journal as well as translational research for mankind. Moreover, the program offers a very interdisciplinary research environment. Students are encouraged to develop their own research questions with supervision from research, methodological and content expertise. Furthermore, our program is designed to focus on developing skills in database and research management.

6. Expected program learning outcomes (PLOs)

By the end of the program, student will be expected to achieve the indicated PLOs through variety of learning method and assessed both during the learning process and final thesis defensive examination. The award of Ph.D. is based on the evidence of students demonstrate the achievement of the expected learning outcomes (PLOs) as follows;

PLOs	The graduates of the program will be able to:
1	Possess moral standards and ethics in academic, research, and medical technology profession
2	Construct the new knowledge or innovation involving medical technology
3	Conduct research works to generate new knowledge or innovation in medical technology
4	Demonstrate leadership and interpersonal skills
5	Demonstrate effective communication skills in academic and research to exchange and share knowledge to public in both national and international levels
6	Perform effective information technology, data analytics and bioinformatics skills

7. Language of study and assessment: English

8. Student Enrollment: Both Thai and international students

9. Admission requirement: The requirements admission of each study plan are as follow.

Study Plan 1 (Research based)

1. Hold a master degree in Medical Technology, Health Science or other related disciplines from academic institute accredited by the Office of the Permanent Secretary, Ministry of Higher Education, Science, Research and Innovation with cumulative GPA > 3.50
2. Have an English Proficiency Examination score as the requirement of Faculty of Graduate Studies
3. Have at least 1 year working experience in Medical Technology or other relates fields
4. Have at least 1 original research publication or academic work in peer reviewed national or international journal as the first author or corresponding author
5. A student who does not meet qualification criteria no.2-4 could apply to the program if the permission is granted by the Administrative Program Committee in concurrence with the Dean of The Faculty of Graduate Studies, Mahidol University

Study Plan 2 (Course work and research based)

Plan 2.1 For students with Master Degree in Medical Technology or other related field.

A student must

1. Hold a master degree in Medical Technology, Health Science or other related disciplines from academic institute accredited by the Office of the Permanent Secretary, Ministry of Higher Education, Science, Research and Innovation
2. Have cumulative GPA not less than 3.50
3. Have an English Proficiency Examination score as the requirement of Faculty of Graduate Studies
4. A student who does not meet qualification criteria no.2-3 could apply to the program if the permission is granted by the Administrative Program Committee in concurrence with the Dean of The Faculty of Graduate Studies, Mahidol University.

Plan 2.2 For students with Bachelor Degree.

A student must

1. Hold bachelor degree in Medical Technology, Health Science or other related disciplines from academic institute accredited by the Office of the Permanent Secretary, Ministry of Higher Education, Science, Research and Innovation with honors
2. Have cumulative GPA not less than 3.50
3. Have an English Proficiency Examination score as the requirement of Faculty of Graduate Studies
4. A student who does not meet qualification criteria no.2-3 could apply to the program if the permission is granted by the Administrative Program Committee in concurrence with the Dean of The Faculty of Graduate Studies, Mahidol University

10. English language requirement

All students are required to obtain an acceptable score of English Proficiency Test approved by the FGS. Acceptable tests and scores are as follows:

English Proficiency Test (Entrance requirement)	Score
IELTS	3.0
TOEFL (iBT)	32
MU GRAD Plus (MU Grad Test + Speaking)	40

11. Study calendar

Each academic year is divided as follows.

Semester 1 : August - December

Semester 2 : January - May

Summer Semester : May - July (to be announced)

12. Curriculum structure

Plan 1 Research only

Course Category	Credits

16. Graduation Requirement

3.1 Plan 1 Research only

1) Total time of study should not exceed the study plan
2) Student must complete dissertation (48 credits) and may enroll in courses without credit.
3) Students must meet the English Competence Standard of Graduate Students, Mahidol University defined by the Faculty of Graduate Studies, Mahidol University.

4) Students must "PASS" the qualifying examination following regulations of Faculty of Graduate Studies, Mahidol University.
5) Students must participate and pass the requirement of professional and personal skills development activities according to the announcement of the Faculty of Graduate Studies, Mahidol University.
6) Students must submit dissertation and pass the oral dissertation examination to the committee appointed by the Faculty of Graduate Studies, and receive "PASS". The oral dissertation defense must be opened to the public and all interested individuals.
7) Student's dissertation or part of dissertation must be published or accepted in an international peer-review journal at least 2 original research articles (the student being the first author or corresponding author) complying with the Office of the Higher Education Commission (OHEC) announcement, regulation of Mahidol University B.E. 2563 for post graduate education, and regulation of dissertation publishing for graduation in a Doctoral Degree Program B.E. 2564

3.2 Plan 2 Coursework and Research

1) Total time of study should not exceed the study plan.
2) Student must complete all courses and total credit as follows
   Plan 2.1. For students with Master Degree in Medical Technology or other related field must complete not less than 12 credits for courseworks and 36 credits for dissertation (Total not less than 48 credits)
   Plan 2.2 For students with Bachelor Degree must complete not less than 24 credits for courseworks and 48 credits for dissertation (Total not less than 72 credits)
3) Students must have a minimum CUM-GPA of 3.50.
4) Students must meet the English Competence Standard of Graduate Students, Mahidol University defined by the Faculty of Graduate Studies, Mahidol University.
5) Students must "PASS" the qualifying examination following regulations of the Faculty of Graduate Studies, Mahidol University.
6) Students must participate and pass the requirement of professional and personal skills development activities according to the announcement of the Faculty of Graduate Studies, Mahidol University.

GRADUATE STUDIES PROGRAMS & STUDY PLANS

MASTER OF SCIENCE PROGRAM

in Medical Technology (International Program)

M.Sc. program in Medical Technology (International Program)
Latest revised in 2022
For academic Year 2023 enrollment

1. Program Title Master of Science Program in Medical Technology (International Program)

2. Name of Degree

In Thai :-

ชื่อเต็ม : วิทยาศาสตรมหาบัณฑิต (เทคนิคการแพทย์)

ชื่อย่อ : วท.ม. (เทคนิคการแพทย์)

In English :-

Full name : Master of Science (Medical Technology)

Abbreviation : M.Sc. (Medical Technology)

3. Responsible unit

3.1 Faculty of Medical Technology, Mahidol University

3.2 Faculty of Graduate Studies, Mahidol University

4. Philosophy

The Master of Science in Medical Technology program is designed in compliance with National Plan of Development for Higher Education, Philosophy of Higher Education, Philosophy of Mahidol University and the world current situation concerning disruptive technology and innovation. The program will prepare students to be capable of upgrading the academic development and new technology in the field of medical technology, medical sciences or other related fields. Students will be equipped with intensive professional knowledge and skills, in order to solve public health problems and to improve quality of life of the people. In addition, students will be able to carry out research works in order to develop better clinical laboratory services, enhance the understanding of diseases, and improve medical diagnosis and treatment of diseases.

5. Distinctive features of the program

The Master degree in Medical Technology is designed to produce highly competent scholars and professionals capable of upgrading the academic development and new technology in the field of medical technology and other health-related fields in order to find solutions for the public health problems of the country and to improve the quality of life of the people. In addition, graduates will promote study and research work in order to develop better clinical laboratory services. The faculty has a broad spectrum of expertise and provides training opportunities in a wide range of disciplines.These include hematology, clinical microbiology, virology, immunology, clinical biochemistry, host-parasite interactions, and free radicals in biology, regulation of gene expression and genetic study, molecular biology, medical laboratory equipment and imaging technology.

6. Expected program learning outcomes (PLOs)

By the end of the program, student will be expected to achieve the indicated PLOs through variety of learning method and assessed both during the learning process and final thesis defensive examination. The award of M.Sc. is based on the evidence of students demonstrate the achievement of the expected learning outcomes (PLOs) as follows;

PLOs	The graduates of the program will be able to:
1	Possess moral standards and ethics in academic, research, and medical technology profession
2	Integrate knowledge in medical technology profession and related fields to approach problem solving and improve work quality
3	Conduct research to solve problem and improve work quality in medical technology
4	Demonstrate teamwork and interpersonal skills
5	Demonstrate effective communication skills in academic and research to exchange and share knowledge to public in both national and international levels
6	Demonstrate effective information technology and data analytics in health sciences research

7. Language of study and assessment: English

8. Student Enrollment: Both Thai and international students

9. Admission requirement:

The requirements admission of each study plan are as follow.

Plan A1 (Research only). A student must

1) Hold a Bachelor's degree in Medical Technology, Health Science or other related disciplines from academic institute accredited by the Office of the Permanent Secretary, Ministry of Higher Education, Science, Research and Innovation
2) Have cumulative GPA not less than 3.25
3) Have an English Proficiency Examination score as the requirement of the Faculty of Graduate Studies
4) Have at least 1 year working experience in medical technology or other related fields
5) Have at least 1 original research publication or academic work in the field of medical technology or other related fields with peer reviewed national or international journal
6) A student who does not meet qualification criteria no. 2-5 could apply to the program if the permission is granted by the Administrative Program Committee in concurrence with the Dean of the Faculty of Graduate Studies, Mahidol University

Plan A2 Applicant (Coursework and Research) A student must

1) Hold a Bachelor's degree in Medical Technology, Health Science or other related discipline from academic institute accredited by the Office of the Permanent Secretary, Ministry of Higher Education, Science, Research and Innovation
2) Have cumulative GPA not less than 2.50
3) Have an English Proficiency Examination score as the requirement by the Faculty of Graduate Studies
4) A student who does not meet qualification criteria no.2-3 could apply to the program if the permission is granted by the Administrative Program Committee in concurrence with the Dean of the Faculty of Graduate Studies, Mahidol University

10. English language requirement

All students are required to obtain an acceptable score of English Proficiency Test approved by the FGS. Acceptable tests and scores are as follows:

English Proficiency Test (Entrance requirement)	Score
IELTS	3.0
TOEFL (iBT)	32
MU GRAD Plus (MU Grad Test + Speaking)	40
MU ELT	84

11. Study calendar

Each academic year is divided into two semesters.

Semester 1 : August - December

Semester 2 : January - May

Summer Semester : May – July (to be announced)

12. Curriculum structure

Plan A1 Research only

Research Project of the Program

Guidelines for conducting a research project are as follows:

1. Engineering of Biological and Chemical Polymers for Applications
2. Data Mining and Biomedical Informatics
3. Detection Tools and Analytical Process Development
4. Bioactive Compounds for Medical Applications
5. Infectious Diseases and Antibiotic Resistant Microorganisms
6. Molecular Genetics of Human Diseases and Cancer
7. Stem Cell Research in Life Science
8. Biosensor for Diagnostic and Medical Applications
9. Medical Imaging and Pattern Recognition Analysis
10. Molecular Informatics for Rational Design and Simulation of Biological and Chemical Entities
11. Food Safety and Environmental Pollution
12. Viruses and Neurodegeneration Research
13. Medical Laboratory Quality Management
14. Medical Laboratory Control Materials Development
15. Aging and Non-Communicable Disease
16. Integrative Holistic Health and Wellness Research

Course Code Explanation

Two first letters represent the abbreviated name of Faculty

MT = Faculty of Medical Technology

Third and Fouth Letters represent the abbreviated name of responsible departments/centers

ID = Inter-departmental courses

CH = Department of Clinical Chemistry

MS = Department of Clinical Microscopy

MI = Department of Clinical Microbiology and Applied Technology

CM = Department of Community Medical Technology

Number in 3 digits (i.e. 5XX, 6XX, and 7XX) show graduate course code.

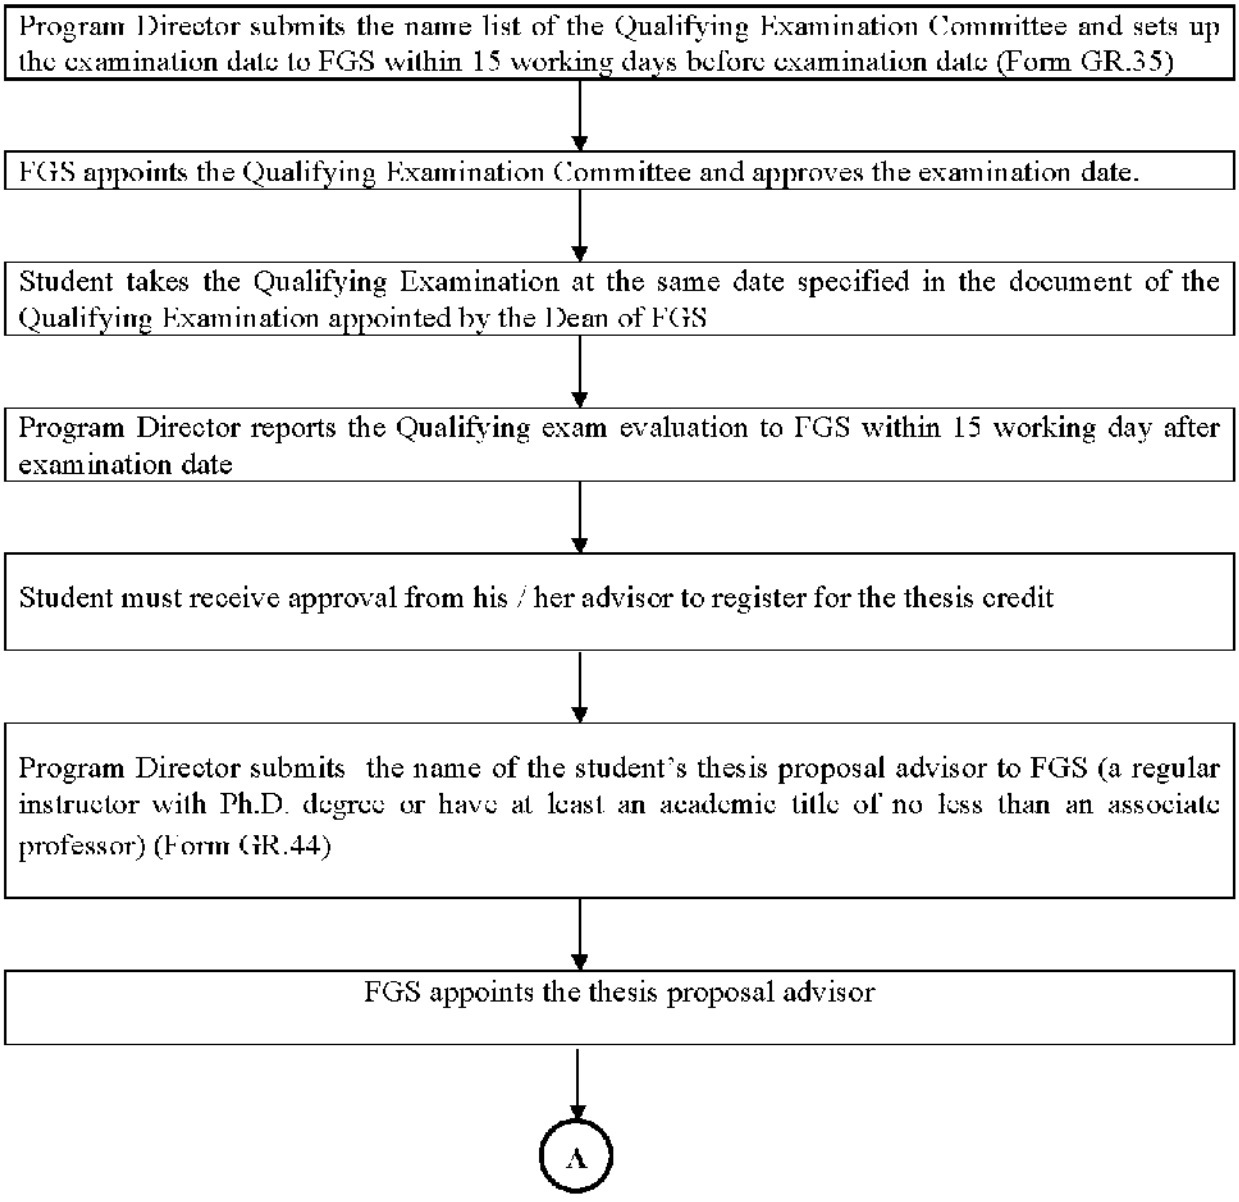
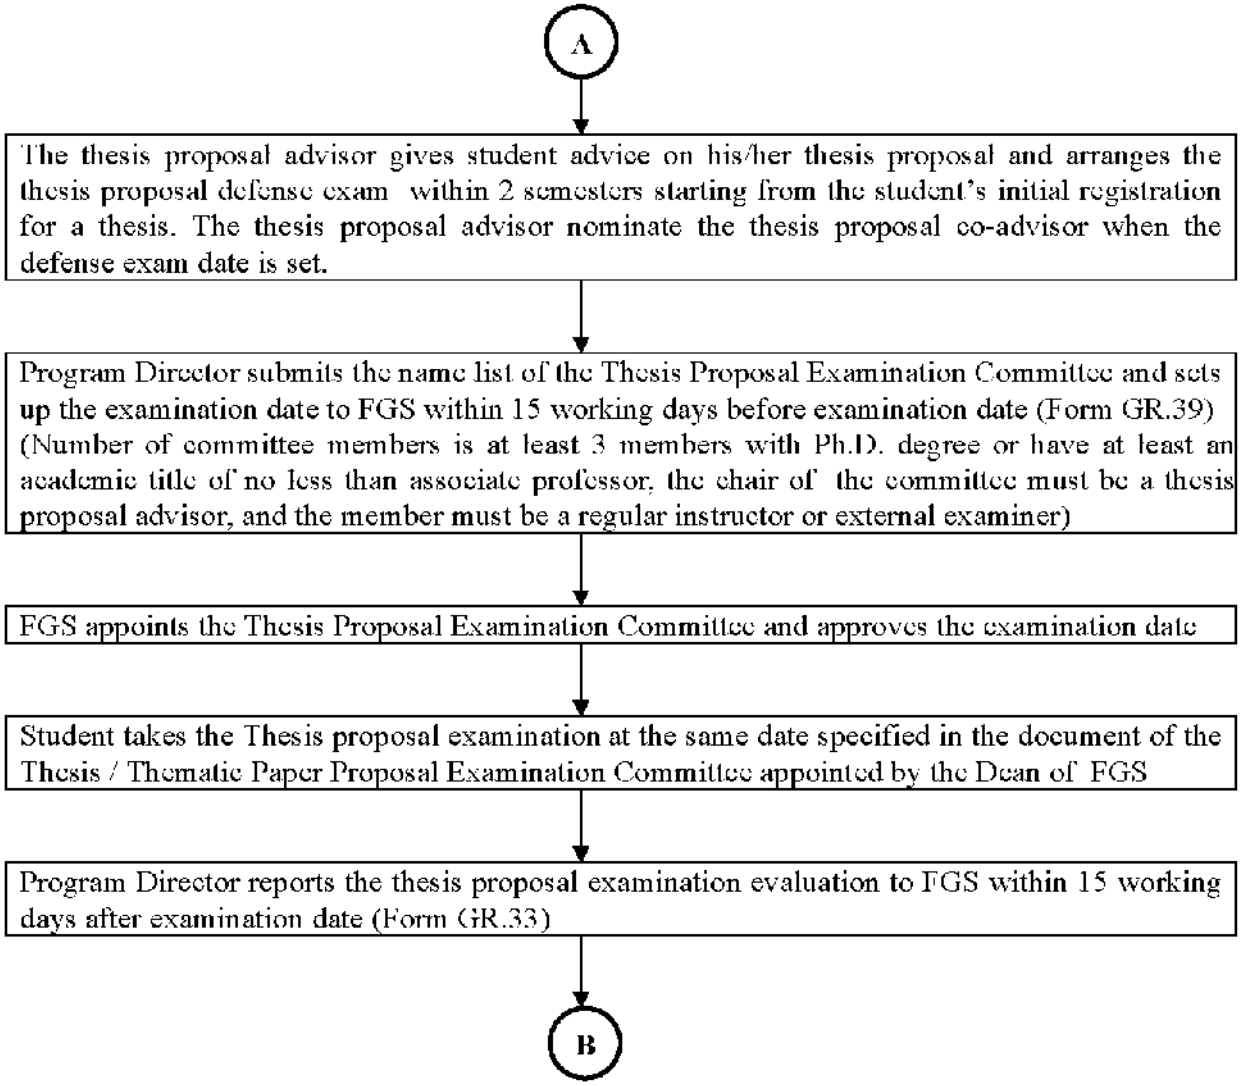
STEP FOR THESIS PROCESS

DOCTOR OF PHILOSOPHY PROGRAM

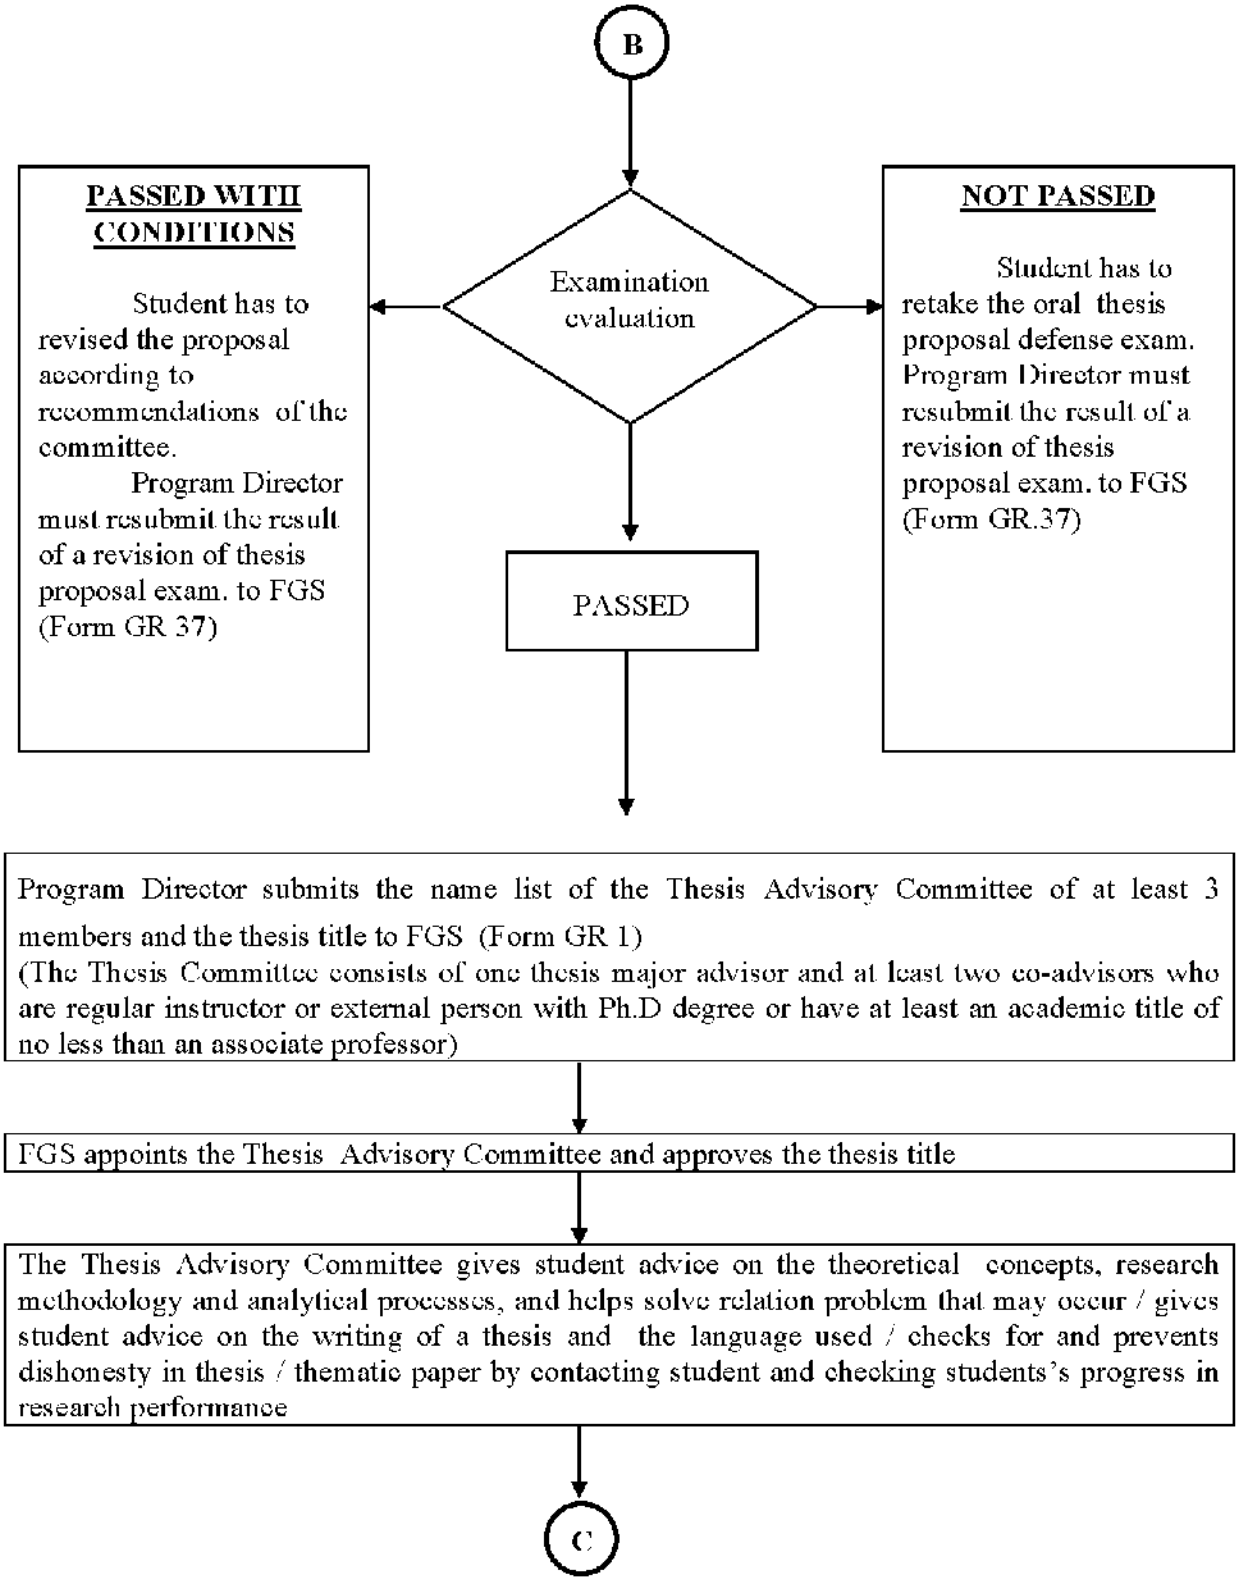
in Medical Technology (International Program)

Steps for Thesis process
(Doctoral Degree Program)

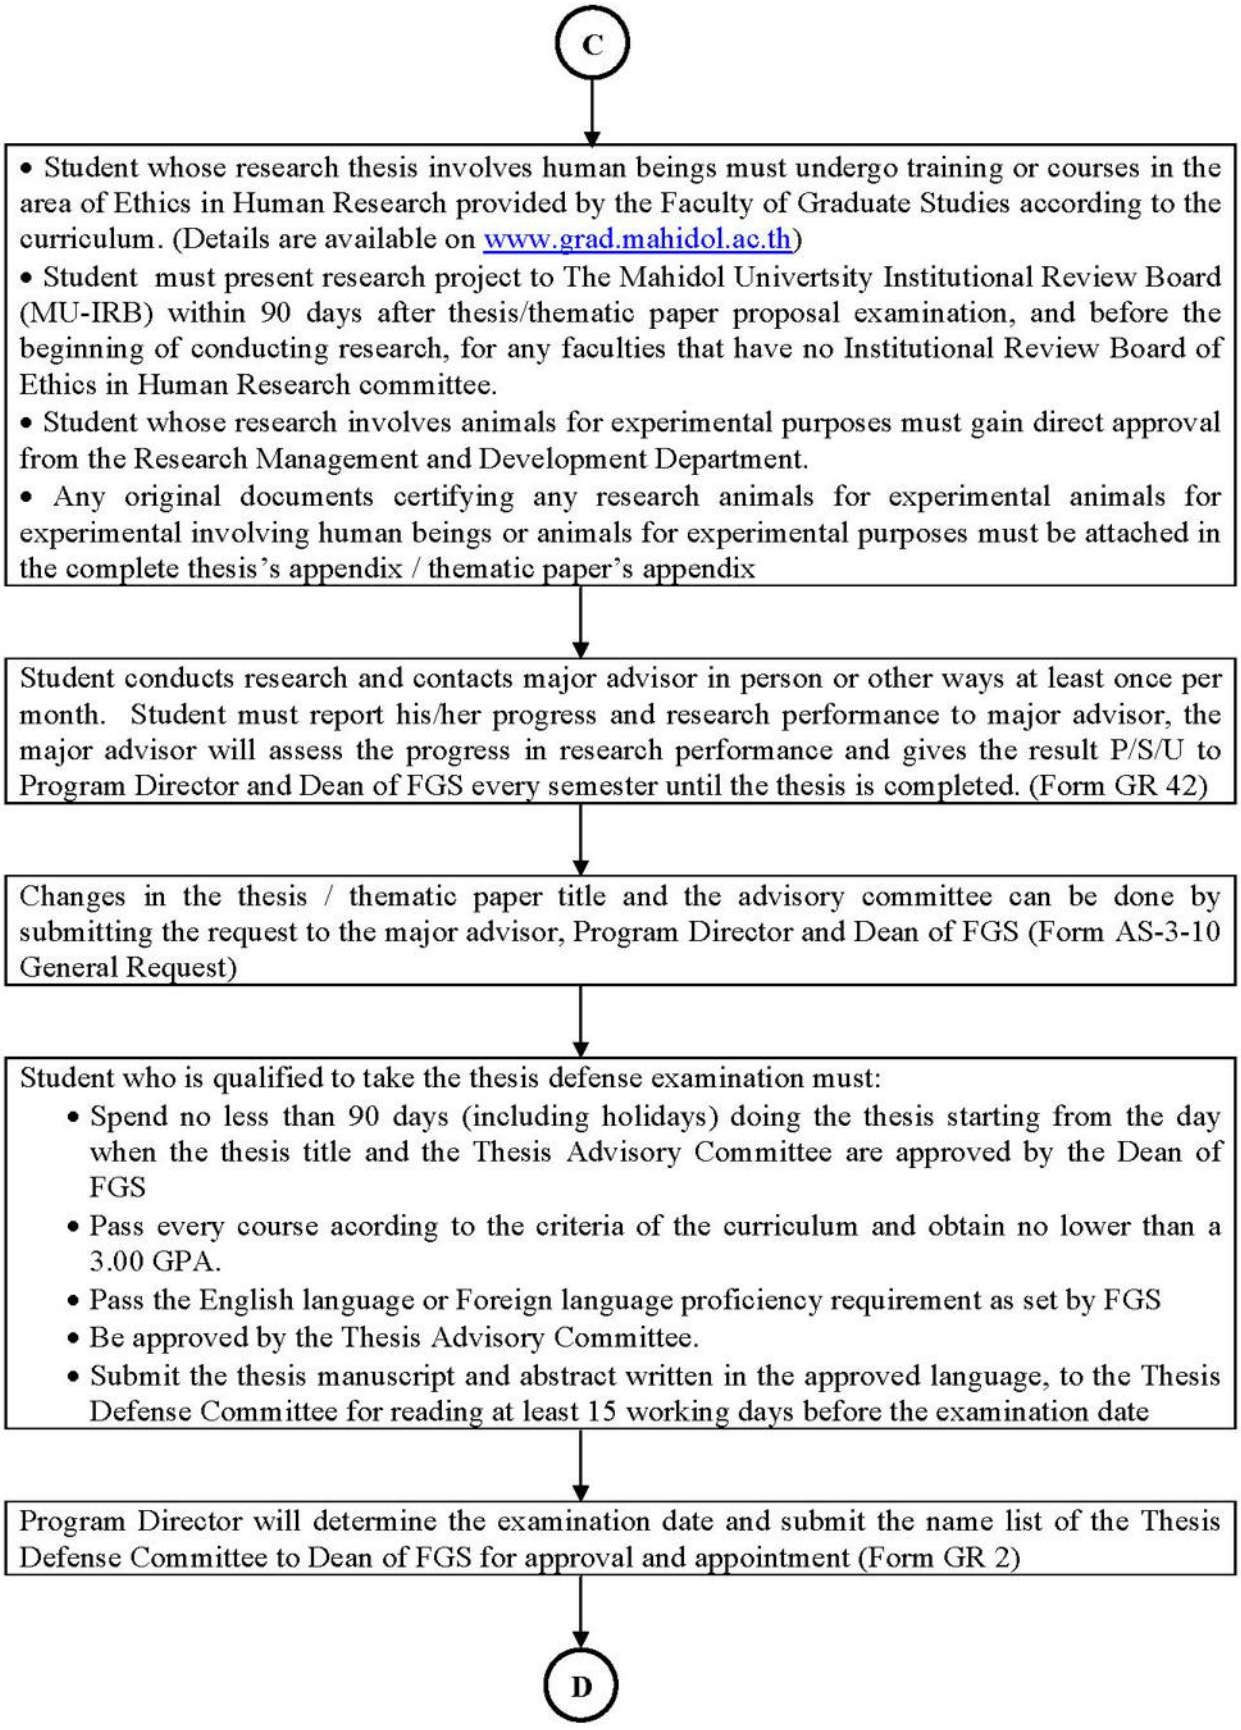




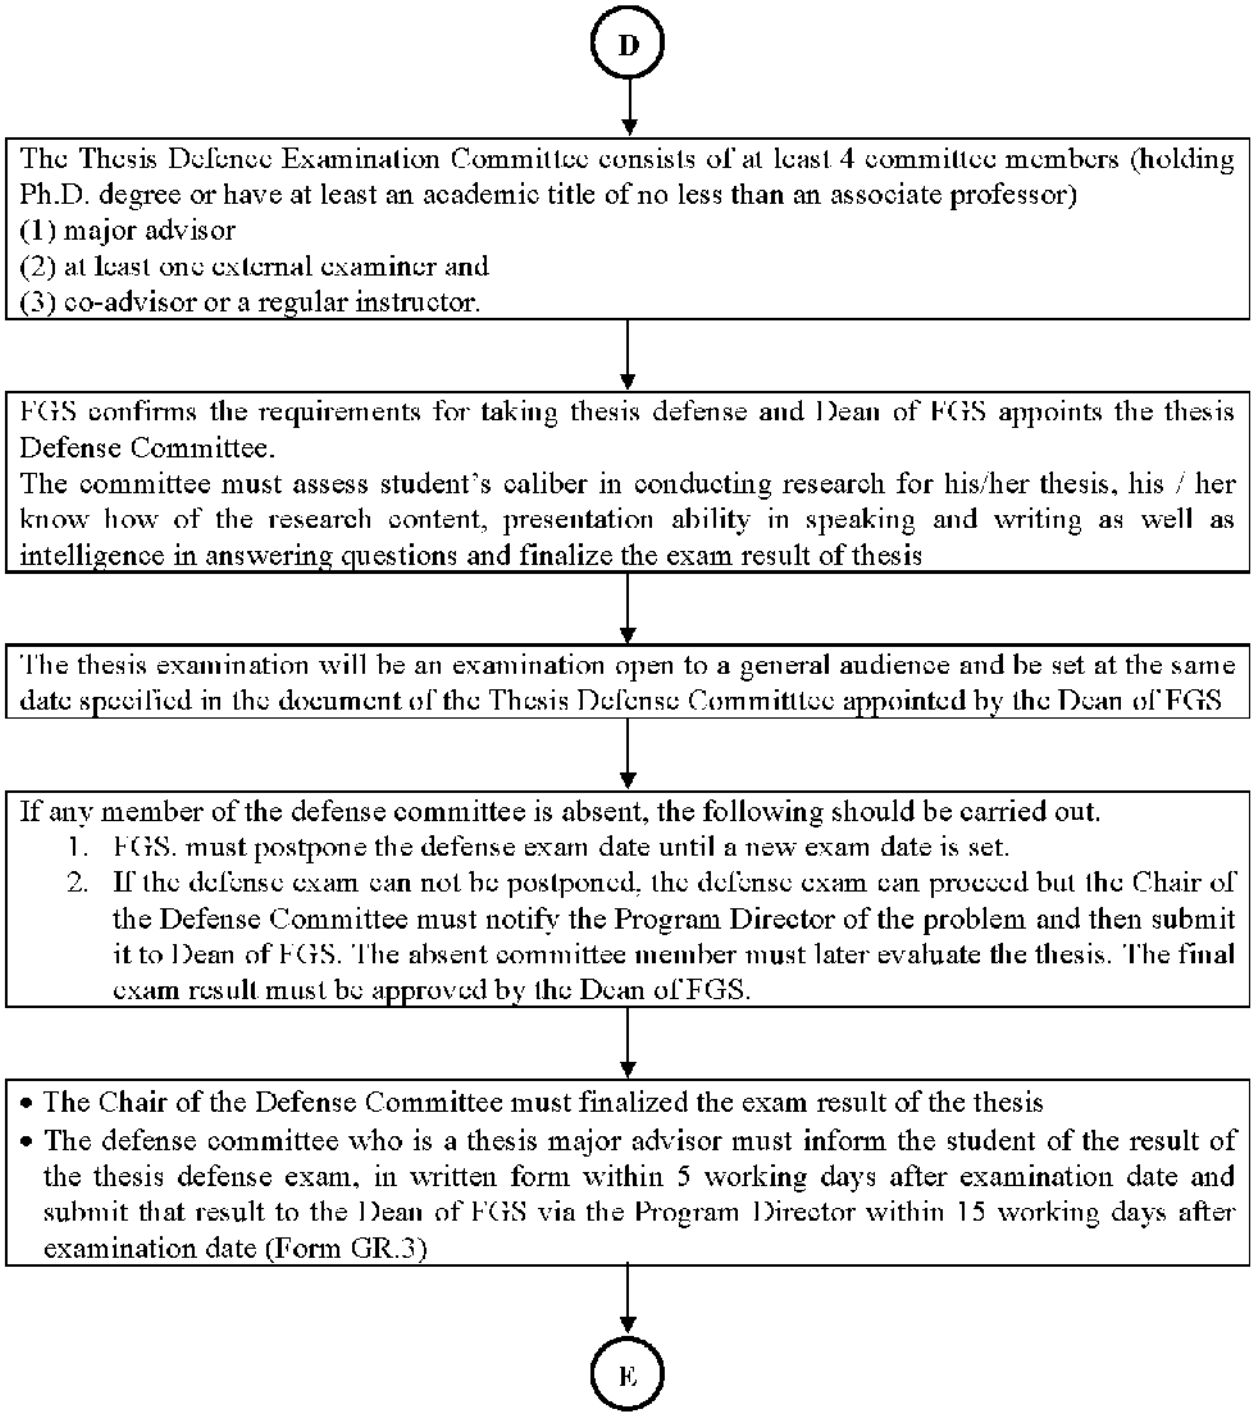
A
The thesis proposal advisor gives student advice on his/her thesis proposal and arranges the thesis proposal defense exam within 2 semesters starting from the student's initial registration for a thesis. The thesis proposal advisor nominate the thesis proposal co-advisor when the defense exam date is set.
Program Director submits the name list of the Thesis Proposal Examination Committee and sets up the examination date to FGS within 15 working days before examination date (Form GR.39) (Number of committee members is at least 3 members with Ph.D. degree or have at least an academic title of no less than associate professor, the chair of the committee must be a thesis proposal advisor, and the member must be a regular instructor or external examiner)
FGS appoints the Thesis Proposal Examination Committee and approves the examination date
Student takes the Thesis proposal examination at the same date specified in the document of the Thesis / Thematic Paper Proposal Examination Committee appointed by the Dean of FGS
Program Director reports the thesis proposal examination evaluation to FGS within 15 working days after examination date (Form GR.33)
B



B
PASSED WITH CONDITIONS
Student has to revised the proposal according to recommendations of the committee.
Program Director must resubmit the result of a revision of thesis proposal exam. to FGS (Form GR 37)
Examination evaluation
NOT PASSED
Student has to retake the oral thesis proposal defense exam. Program Director must resubmit the result of a revision of thesis proposal exam. to FGS (Form GR.37)
PASSED
Program Director submits the name list of the Thesis Advisory Committee of at least 3 members and the thesis title to FGS (Form GR 1)
(The Thesis Committee consists of one thesis major advisor and at least two co-advisors who are regular instructor or external person with Ph.D degree or have at least an academic title of no less than an associate professor)
FGS appoints the Thesis Advisory Committee and approves the thesis title
The Thesis Advisory Committee gives student advice on the theoretical concepts, research methodology and analytical processes, and helps solve relation problem that may occur / gives student advice on the writing of a thesis and the language used / checks for and prevents dishonesty in thesis / thematic paper by contacting student and checking students's progress in research performance
C



C
• Student whose research thesis involves human beings must undergo training or courses in the area of Ethics in Human Research provided by the Faculty of Graduate Studies according to the curriculum. (Details are available on www.grad.mahidol.ac.th)
• Student must present research project to The Mahidol Univertsity Institutional Review Board (MU-IRB) within 90 days after thesis/thematic paper proposal examination, and before the beginning of conducting research, for any faculties that have no Institutional Review Board of Ethics in Human Research committee.
• Student whose research involves animals for experimental purposes must gain direct approval from the Research Management and Development Department.
• Any original documents certifying any research animals for experimental animals for experimental involving human beings or animals for experimental purposes must be attached in the complete thesis's appendix / thematic paper's appendix
Student conducts research and contacts major advisor in person or other ways at least once per month. Student must report his/her progress and research performance to major advisor, the major advisor will assess the progress in research performance and gives the result P/S/U to Program Director and Dean of FGS every semester until the thesis is completed. (Form GR 42)
Changes in the thesis / thematic paper title and the advisory committee can be done by submitting the request to the major advisor, Program Director and Dean of FGS (Form AS-3-10 General Request)
Student who is qualified to take the thesis defense examination must:
• Spend no less than 90 days (including holidays) doing the thesis starting from the day when the thesis title and the Thesis Advisory Committee are approved by the Dean of FGS
• Pass every course acording to the criteria of the curriculum and obtain no lower than a 3.00 GPA.
• Pass the English language or Foreign language proficiency requirement as set by FGS
• Be approved by the Thesis Advisory Committee.
• Submit the thesis manuscript and abstract written in the approved language, to the Thesis Defense Committee for reading at least 15 working days before the examination date
Program Director will determine the examination date and submit the name list of the Thesis Defense Committee to Dean of FGS for approval and appointment (Form GR 2)
D



D
The Thesis Defence Examination Committee consists of at least 4 committee members (holding Ph.D. degree or have at least an academic title of no less than an associate professor)
(1) major advisor
